<u>Update Instructions</u>

If you are installing this script for the first time then don't need to follow these instructions.

1. If you have already used this script then just upload **livo-bank-update.zip** file and **extract** that file into the previous installation directory. All files will be replaced automatically.

2. You need to enter a url on your browser for updating new database tables. If your website link is https://www.example.com then you need run https://www.example.com/migration/update
